June 10, 2026

To whom it may concern,

As the Mechanical Engineering Program Director at UDEM and as his professor in Mechanics of Materials and Materials Laboratory, I am pleased to recommend Ángel Candelaria for the Technical Studentship Program in Mechanical Engineering at CERN. I can speak to Ángel Candelaria overall academic trajectory and his growth as an engineer throughout his studies.

As my student in Mechanics of Materials, he showed very good interpretation and application of mechanical concepts. In Materials Laboratory, he led a project involving the case hardening of low-carbon steel to enhance fatigue resistance, reporting CAD design – layouts, lathe manufacturing process alongside good use of measuring tools, case hardening treatment process, hardness measurement and metallurgical analysis, multiple topics and skills that require both experimental discipline and the ability to interpret material behavior, both of which he handled confidently.

I am confident that his technical foundation, curiosity, and commitment to his professional development make him a strong candidate for a program of this nature. CERN's engineering environment would both challenge and bring out the best in him.

I recommend him and encourage you to consider his application positively.

Sincerely,

Yaneth Bedolla Gil (10 jun.. 2026 09:41:13 MDT)
