To Whom It May Concern,

I am pleased to write this letter in support of Mr. Ángel Candelaria Rodríguez's application for the CERN Technical Studentship Programme in Mechanical Engineering.

I am a Professor of Physics at the University of Monterrey (UDM), Mexico, and I had the opportunity to know Ángel as a student during his undergraduate studies. Throughout my interactions with him, I found him to be a dedicated, responsible, and intellectually curious student with a genuine interest in engineering and the physical sciences.

As a student, Ángel consistently demonstrated commitment to his academic responsibilities and a willingness to engage with challenging scientific concepts. He approached coursework with seriousness and perseverance, showing strong analytical skills and a desire to understand the underlying principles behind engineering and physical phenomena. His academic trajectory reflects a sustained effort toward excellence and continuous learning.

Beyond the classroom, Ángel participated in a university Service-Learning initiative in which undergraduate students collaborated with secondary school students through science outreach activities. As part of this experience, he helped explain scientific concepts and supported younger students during a science fair. While his role was primarily supportive, he demonstrated professionalism, patience, and the ability to communicate technical ideas in a clear and approachable manner. This experience highlighted his willingness to contribute to collaborative educational activities and work effectively with others.

Ángel has also pursued opportunities to broaden his technical skills through projects involving mechanical engineering, materials testing, manufacturing processes, computer-aided design, and data analysis. His participation in research and engineering-related activities reflects both initiative and a genuine enthusiasm for applying scientific knowledge to practical challenges. These experiences have allowed him to develop a solid foundation that I believe will serve him well in an international research and engineering environment.

In addition to his technical abilities, Ángel is respectful, reliable, and eager to learn. He works well with peers, accepts feedback constructively, and approaches new challenges with a positive attitude. These qualities, combined with his academic preparation and motivation, make him a strong candidate for a program such as the CERN Technical Studentship.

I am confident that Ángel will take full advantage of the opportunities offered by CERN and will represent his institution with professionalism and dedication. Therefore, I recommend him for this program without reservation.

Please feel free to contact me if additional information is required.

Sincerely,

Dr. Ajax Santos-Guevara
Professor of Physics
Department of Physics and Mathematics
Universidad de Monterrey (UEM)
Monterrey, Mexico
