Subject: Letter of Recommendation for Juan Angel Candelaria Rodriguez

To whom it may concern,

I am pleased to write this letter in support of Mr. Juan Angel Candelaria Rodriguez for the CERN Technical Studentship Programme in Mechanical Engineering.

I have known Ángel through his participation in AstroUDEM, the Astronomy Club at Universidad de Monterrey (UDM), where I serve as faculty advisor. Through this experience, I had the opportunity to observe his interest in science and technology, as well as his willingness to engage in activities that complement his formal training in Mechanical Engineering.

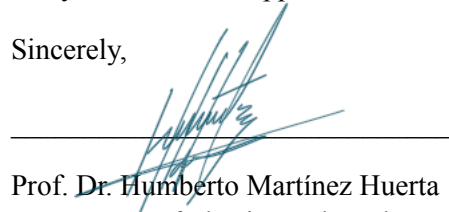

Ángel has consistently demonstrated responsibility, professionalism, and a positive attitude toward collaborative work. He actively participated in the club's activities and discussions, showing curiosity about scientific and engineering challenges and a genuine motivation to broaden his knowledge beyond the requirements of his academic program. He approaches new topics with enthusiasm and is willing to invest the necessary effort to understand unfamiliar concepts.

One quality I particularly appreciate is his commitment to continuous learning. While participating in AstroUDEM, he showed interest in the technological and scientific aspects of large-scale research projects, including those related to particle physics and scientific instrumentation. These experiences allowed him to strengthen his interdisciplinary perspective and reinforced his motivation to contribute in technical environments where engineering plays a key role in advancing scientific knowledge.

Based on my interactions with him, I believe Ángel possesses the maturity, work ethic, and motivation necessary to benefit from an international research environment such as CERN. I am confident that this opportunity would contribute significantly to his professional development and that he would approach it with dedication and responsibility.

I therefore recommend Ángel Candelaria for the CERN Technical Studentship Programme and wish him every success in his application.

Sincerely,

Prof. Dr. Humberto Martínez Huerta
Department of Physics and Mathematics
School of Engineering and Technologies
Universidad de Monterrey (UDM)
