Selection Committee

Technical Studentship Programme – Mechanical Engineering

CERN

Recommendation Letter for Mr. Ángel Candelaria Rodríguez

Dear Members of the Selection Committee,

I am pleased to write this letter in strong support of Mr. **Ángel Candelaria Rodríguez** and his application to the Technical Studentship Programme in Mechanical Engineering at CERN.

My name is Jesús Tamez, and I serve as an Associate Professor and Consultant within the School of Engineering and Technologies at the Universidad de Monterrey (UDEM), Mexico. I have known Ángel for approximately two years through his academic activities and interactions within our engineering programs, where I have had the opportunity to observe both his technical development and his personal commitment to excellence.

From the beginning, Ángel distinguished himself as a highly motivated and intellectually curious student. He consistently demonstrates a level of maturity, discipline, and professionalism that exceeds what is typically expected from undergraduate students at his stage of development. His academic performance reflects not only strong intellectual capabilities but also an exceptional work ethic and a genuine passion for engineering and scientific discovery.

Throughout his studies in Mechanical and Administrative Engineering, Ángel has developed solid competencies in mechanical design, manufacturing processes, materials engineering, thermodynamics, finite element analysis, and data-driven engineering methodologies. He possesses a rare combination of analytical thinking and practical engineering skills, allowing him to approach technical challenges from both theoretical and applied perspectives.

What I find particularly impressive is his proactive attitude toward learning beyond the classroom. Ángel has actively participated in research and technical projects involving machine learning applications, tribological testing, materials characterization, and predictive engineering models. His ability to integrate knowledge from multiple disciplines demonstrates the intellectual versatility that is highly valued in advanced scientific and engineering environments.

His previous technical internship within the aerospace manufacturing sector further evidences his commitment to engineering practice. There he gained experience with manufacturing operations, engineering drawings, precision measurement instruments, and industrial processes, strengthening his understanding of quality, safety, and technical rigor.

Beyond his technical qualifications, Ángel possesses the personal attributes necessary to succeed in an international organization such as CERN. He is respectful, collaborative, adaptable, and eager to contribute to

DE INGENIERIA
Y TECNOLOGIAS
UNIVERSIDAD
DE MONTERREY

multidisciplinary teams. His advanced English proficiency, combined with his ability to communicate effectively and work constructively with others, will allow him to integrate successfully into a multicultural environment.

His achievements—including full academic merit scholarships, recognition as valedictorian in his technical preparatory studies, participation in undergraduate research, and a Top 10% worldwide ranking in the NASA Space Apps Challenge—demonstrate a consistent pattern of excellence, initiative, and perseverance.

Based on my experience working with him, I have no doubt that Ángel possesses the technical aptitude, academic preparation, character, and potential necessary to benefit from and contribute meaningfully to the demanding engineering projects developed at CERN. I therefore recommend him enthusiastically and without reservation for the Technical Studentship Programme.

"As an educator and engineering professional, I am confident that Mr. Ángel Candelaria Rodríguez possesses the technical foundation, intellectual curiosity, and professional maturity required to excel in an organization of CERN's caliber. I strongly endorse his application and believe he will represent both Universidad de Monterrey and Mexico with distinction."

Should you require any additional information regarding his qualifications or character, please do not hesitate to contact me.

Yours sincerely,

Jesús Alberto Tamez García, ChEng. MSc. MBA.
